

BROWNSTONE
PRIVATE SECURITY

FREIGHT INDUSTRY

Brownstone Private Security understands the risk companies face in transporting their products domestically and internationally. Failure to protect products during transit can result in serious financial and time losses.

Brownstone offers a variety of affordable security services, aimed at reducing risk and exposure in the freight industry.

Ways Brownstone Can Help **Freight Monitoring Services**

Brownstone is able to monitor a product's movement from the second it leaves your freight facility to the second it reaches its final destination. Our monitoring protocols include a custom and detailed security plan, specific to client needs, and established prior to departure.

Vehicle Escort Security Services

Brownstone vehicle escort security services provide the highest quality cargo management. Our expertly trained escort personnel work closely with clients to set expectations and address all security needs prior to transportation. Escort personnel communicates thoroughly with the driver(s) to ensure all routes are confirmed and protocols are understood.

Escort personnel also utilizes tracking technology and continuously collaborates with our Brownstone Operations Center to ensure all pertinent info, signals, seal numbers, etc are communicated.

High Value Cargo Protection

Brownstone is ready to provide armed or unarmed uniformed personnel to patrol and guard your facilities. Our mobile capabilities include marked/unmarked vehicles,

bicycles, segways, golf carts or other, as needed. Brownstone can also provide off-duty law enforcement personnel to further protect your assets.

All security personnel is carefully screened, selected and expertly trained to meet client and site standards. Brownstone specifically recruits and hires offers local to each client account and based on site requirements.

Command Center Services

Brownstone's 24/7 Operations Center monitors all employee activity and ensures compliance of standard operating procedures (SOP's).

Our operations center has the ability to make real-time notifications and monitor CCTVs/hard-wire surveillance systems. The center focuses on observing and reporting, as well as making immediate contact to clients, supervisors and law enforcement.

Freight Security Services: 24/7 Operations Center • Camera Installation & Monitoring • Operations Center Notifications • Driver Interviews • Fixed Post Security Personnel • GPS Tracking • Investigations • Security Escort Personnel
